## Space Pulse Tube Cryocooler Developments 85

- Characterization of the NGST 150 K Mini Pulse Tube Cryocooler** ..... 85  
*N. Abhyankar, Dynacs, Inc., Albuquerque, NM; T. Davis, AFRL, Kirtland AFB, NM;  
 D. Curran, Aerospace Corp., El Segundo, CA*
- Performance Test Results of a Miniature 50 to 80 K Pulse Tube Cooler** ..... 93  
*T. Trollier, A. Ravex, Air Liquide DTA, France; I. Charles, L. Duband, CEA-SBT,  
 France; J. Mullié, P. Bruins, T. Benschop, Thales Cryogenics, The Netherlands;  
 M. Linder, ESA/ESTEC, The Netherlands*
- Performance of Japanese Pulse Tube Coolers for Space Applications** ..... 101  
*A. Kushino, H. Sugita, Y. Matsubara, JAXA, Japan*
- High Capacity Staged Pulse Tube** ..... 109  
*C. Jaco, T. Nguyen, D. Harvey, E. Tward, NGST, Redondo Beach, CA*
- Lockheed Martin RAMOS Engineering Model Cryocooler** ..... 115  
*D. Frank, E. Roth, P. Champagne, J. Olson, B. Evtimov, R. Clappier, T. Nast, Lockheed  
 Martin ATC, Palo Alto, CA; T. Renna, B. Martin, Lockheed Martin CSS, Newtown, PA*
- Lockheed Martin Two-Stage Pulse Tube Cryocooler for GIFTS** ..... 121  
*T. Nast, D. Frank, E. Roth, P. Champagne, J. Olson, B. Evtimov, R. Clappier, Lockheed  
 Martin ATC, Palo Alto, CA; T. Renna, B. Martin, Lockheed Martin CSS, Newtown, PA*
- Second Generation Raytheon Stirling/Pulse Tube Hybrid Cold Head  
 Design and Performance** ..... 127  
*C. Kirkconnell, K. Price, K. Ciccarelli, J. Harvey, Raytheon, El Segundo, CA*

## Commercial and Industrial Pulse Tube Cryocoolers 133

- Efficient 10 K Pulse Tube Cryocoolers** ..... 133  
*C. Wang, Cryomech, Inc., Syracuse, NY*
- Development of Stirling-Type Coaxial Pulse Tube Cryocoolers** ..... 141  
*L. Yang, G. Thummes, Univ. of Giessen, Germany*
- Low Temperature High Frequency Pulse Tube Cooler Using Precooling** ..... 149  
*J. Poncet, I. Charles, A. Gauthier, CEA-SBT, Grenoble, France; T. Trollier,  
 Air Liquide DTA, Sassenage, France*
- Development of a Single Stage Pulse Tube Refrigerator with  
 Linear Compressor** ..... 157  
*J. Yuan, J. Maquire, American Superconducting Co., Westborough, MA*
- A Commercial Pulse Tube Cryocooler with 200 W Refrigeration at 80 K** .... 165  
*J. Zia, Praxair, Inc., Tonawanda, NY*
- Large Scale Cryocooler Development for Superconducting Electric  
 Power Applications (HTS-4)** ..... 173  
*N. Lynch, Praxair, Inc., Tonawanda, NY*
- The Effect of Mean Pressure on Large Pulse Tube Cryocoolers** ..... 177  
*N. Lynch, Praxair, Inc., Tonawanda, NY*

**Thermoacoustically-Driven Pulse Tube Cryocoolers 181**

**Operation of Thermoacoustic Stirling Heat Engine Driven Large Multiple Pulse Tube Refrigerators . . . . . 181**

*B. Arman, J. Wollan, V. Kutsubo, Praxair, Inc. Tonawanda, NY; S. Backhaus, G. Swift, Los Alamos Nat'l Lab, Los Alamos, NM*

**A Traveling Wave Thermoacoustic Refrigerator within Room Temperature Range . . . . . 189**

*Y. Huang, E. Luo, W. Dai, Z. Wu, Chinese Academy of Sciences, Beijing, China*

**Building a High-Efficiency and Compact-Sized Thermoacoustically-Driven Pulse Tube Cooler . . . . . 195**

*W. Dai, E. Luo, Y. Zhou, J. Wu, W. Zhu, Chinese Academy of Sciences, Beijing, China*

**Linear Compressor Development and Modeling 201**

**Development of a Linear Compressor for Use in G-M Cryocoolers . . . . . 201**

*J. Corey, E. James, CFIC-Qdrive, Troy, NY; A. Kashani, B. Helvensteijn, Atlas Scientific, San Jose, CA; G. Rhoads, AFRL, Wright-Patterson AFB, OH*

**Compression Losses in Cryocoolers . . . . . 209**

*J. Reed, G. Davey, M. Dadd, P. Bailey, Oxford Univ., England*

**A Novel Method for Controlling Piston Drift in Devices with Clearance Seals . . . . . 215**

*P. Spoor, J. Corey, CFIC, Troy, NY*

**Verification of Long Life Operation through Real Time Dynamic Alignment Tracking . . . . . 225**

*W. Gully, E. Marquardt, D. Glaister, Ball Aerospace, Boulder, CO; N. Abhyankar, Dynacs, Albuquerque, NM; and T. Davis, AFRL, Kirtland AFB, NM*

**Sensorless Balancing of a Dual-Piston Linear Compressor of a Stirling Cryogenic Cooler . . . . . 231**

*V. Dubrovsky, Loughborough Univ., England; A. Veprik, N. Pundak, Ricor Ltd., Israel*

**Dynamically Counterbalanced Single-Piston Linear Compressor of a Cryogenic Cryocooler . . . . . 241**

*A. Veprik, I. Nachman, N. Pundak, Ricor Ltd., Israel*

**Pulse Tube Analysis and Experimental Measurements 251**

**Counterflow Pulse-Tube Refrigerator . . . . . 251**

*M. Will, A. de Waele, Dept. of Applied Physics, Eindhoven Univ. of Tech., The Netherlands*

**A Study of Performance Improvement of the Coaxial Inertance Tube Pulse Tube Cryocooler . . . . . 261**

*S. Park, Y. Hong, H. Kim, Korea Inst. of Machinery & Materials, Taejeon, Korea; Y. Kim, Pusan Nat'l Univ., Korea*

**Measurements of Phase Shifts in Inertance Tubes . . . . . 267**

*M. Lewis, P. Bradley, R. Radebaugh, NIST, Boulder, CO; E. Luo, Chinese Academy of Sciences, Beijing, China*
