

Subject Index

- Adv. Mobile Telecommunication Tech., Inc., 279
- Aerospace Corporation:
 - CSIM system design model, 1, 861
 - flexure bearing design, 413
 - spacecraft integration trades, 873
 - thermal storage unit, 747
- Air Liquide pulse tube, 223
- AIRS cryocooler development, 195, 885, 895
- Alabama Cryogenic Engineering, 653
- Algorithms and analysis methods:
 - comparison of PT & Stirling perform., 431
 - cooler BOL/EOL sizing analysis, 885
 - cryogenic system design, 861, 885
 - etched foil regenerator flow, 451
 - flexure bearing design charts, 413
 - flow visualization in pulse tubes, 355, 365
 - heat transfer coef. in high-NTU matrices, 441
 - periodic temp. variation technique, 441
 - piston resonance characteristics, 421
 - piston (warm expander) pulse tube, 309, 319
 - pseudo-Ericsson cycle G-M, 643
 - pulse tube performance model, 327, 345, 431
 - pulse tube heat and mass flows, 335, 345
 - Stirling-cycle performance model, 147, 431
 - transient cryocooler thermal perf., 163
 - vibration control, 727
- Ames Research Center (NASA), 327, 345
- Ames Laboratory (Iowa State Univ.), 663, 669
- APD Cryogenics:
 - 65K two-stage MR/O₂ refrig., 537
 - Cryotiger J-T cooler:
 - performance with mixed gases, 515
 - vibration of, 737
 - integration with SQUIDS, 925
 - cost reduction improvements, 521
 - with Neon for application at 25K, 547
 - Early pulse tube developments, 261
- Applications of cryocoolers:
 - cryoelectronics, 97, 509
 - high temperature superconductors (*see* HTS applications)
 - IR focal planes, 885
 - liquefaction of nitrogen, 157, 247
 - magnetocardiography using SQUIDS, 727
 - mine-sweeping magnets, 627, 653, 813
 - nondestructive eval. using SQUIDS, 925
 - space experiments (*see* Space experiments)
 - space instruments (*see* Space instruments)
 - weapons systems, 17
- Applied Superconductivity Center, 547
- ARCOPTR, 327
- Ball Aerospace cryocoolers:
 - 2W-55K single-stage AFP Stirling, 55
 - 30K two-stage Stirling, 11, 69
 - 35K/60K three-stage Stirling, 1
 - 77K closed-cycle J-T COOLLAR, 493
- Bearings:
 - Aerospace flexure, 413
 - MTI linear journal, 403
- BEL mini-linear cooler, 119
- BETSCE, 567, 577
- Brayton cycle cryocoolers, 1, 465, 475, 485
- British Aerospace (BAe) cryocoolers (*see* Matra Marconi Space cryocoolers)
- CDNSWC (*see* Naval Surface Warfare Center)
- CEA/CENG (France):
 - 50-80K pulse tube development, 213
- Characterization testing:
 - APD Cryotiger J-T, 737, 925
 - Ball 2W-55K cryocooler, 55
 - Ball 30K Stirling cooler, 69
 - Ball 77K closed-cycle COOLLAR, 493
 - Creare 65K SSC Stirling, 45
 - Creare 5W-65K reverse-Brayton, 465
 - data acquisition software for, 853
 - gas-gap heat switch, 795
 - Hughes SSC I & II, 35
 - MMS/RAL two-stage Stirling, 79, 89
 - Texas Instruments 1W-80K, 127, 163
 - TRW 3503 & 6020 P-T cryocoolers, 173, 183
- Charcoal sorbents, 597
- Chinese Academy of Sciences, 529
- COM DEV (MOPITT cooler vib.), 711
- Compressors:
 - charcoal sorption, 597
 - J-T oil lubricated, 493
 - MTI linear diaphragm, 403
- Conductance measurements:
 - demountable interface, 813, 823
 - stacked screens, 459
 - tension band cryo support, 773
- Convection in pulse tube vs. angle, 183, 393

- Cooldown behavior modeling, 163
- COOLLAR, 493
- Cornell Univ., 431
- Creare Cryocoolers:
 - 5W-65K reverse-Brayton, 1, 465
 - 65K SSC Stirling cooler, 45
 - miniature reverse-Brayton, 475
- Cryocooler applications (*see* Applications of cryocoolers)
- Cryocooler integration technologies (*see* Integration of cryocoolers)
- Cryogenerator with two-component, two-phase fluid, 157
- CryoTiger:
 - cost reduction activities, 521
 - integrated with SQUIDs, 925
 - performance with various refrigerants, 515
 - vibration of, 737
- CSIM cryosystem design software, 1, 861
- CTI-Cryogenics, 607

- Daido Hoxan:
 - pulse tube with active buffer, 247
 - pulse tube with long neck tube, 269
- DARPA, 25
- DC flow, effect on P-T and Stirling efficiency, 385
- DECS vibration controller, 711
- Diaphragm compressor:
 - Creare Stirling, 45
 - MTI hydraulic driven, 403
- DoD linear tactical coolers, 17

- Ecole Normale Supérieure, 223
- Electric field emissions (*see* EMI/EMC measurements)
- Electro Thermo Associates, 309
- Electromagnetic interference (*see* EMI/EMC measurements)
- Electronics:
 - cooler drive and control, 705, 841, 895
- EMI/EMC measurements:
 - Ball 77K closed-cycle COOLLAR, 493
 - TRW 3503 P-T cryocooler, 183
 - with SQUID applications, 925, 935
- Erbium regenerator materials, 79, 617, 663, 669
- European Space (ESA) activities:
 - RAL/MMS 2-stg Stirling, 79, 89
 - 50-80K pulse tube development, 213
 - 50-80K Stirling applications, 59

- Feed forward vibration controller, 705, 711, 727
- Flex strap design and test, 807, 885, 917
- Flexure bearings, 413
- Focal plane dewars, 885
- Fokker Space radiant cooler, 917
- Forschungszentrum Jülich, 925
- Forschungszentrum Karlsruhe, 255

- Gas effects on piston resonance, 421
- Gas-gap heat switches, 795

- Gedeon Associates, 385
- General Atomics, 813
- Generated vibration measurements (*see* Vibration, cooler generated)
- Georgia Institute of Technology, 335
- Gifford-McMahon Cryocoolers:
 - 2W-4K with Erbium regenerator materials, 617
 - geometric scaling of, 627
 - low-cost for HTS applications, 607
 - low-temperature regenerators for, 653, 663, 669
 - neodymium plate regenerator for, 653
 - temperature stabilization of, 765
 - valve pressure loss effects, 637
 - valve timing effects, 643
- Goddard Space Flight Center:
 - 30K Ball cooler development, 11
 - Sunpower M77 cooler vibration, 697

- HTS applications:
 - cooler program overview, 25
 - filter resonators, 97, 521, 607
 - large motors, 943
 - magnetocardiography, 727
 - magnets, 547
 - nondestructive evaluation (NDE), 925
 - SQUIDs, 727, 765, 925, 935
- Heat conduction (*see* Conductance measurements)
- Heat interceptor:
 - with Hughes SMTS cooler, 783
 - with MMS/RAL 2-stg Stirling, 79
- Heat pipes, cryogenic, 831
- Heat switches, 795
- High temperature superconductor applications (*see* HTS applications)
- Hong Ik University, 147
- Hughes Aircraft:
 - cooler drive electronics, 841
 - heat interceptor integration, 79, 783
 - LCC low-cost pulse tube, 229
 - PSC 60K Stirling cooler, 1, 29
 - pulse tube research, 285, 335
 - SSC I & II space coolers, 35
 - vibration suppression of ISSC, 705
- Hydraulic driven compressor, 403
- Hydride materials:
 - in sorption coolers, 567, 577, 587
 - to actuate heat switch, 795
- Hymatic, Stirling cooler, 109

- ILK, 925
- Indian Institute of Technology, 157
- Innovative Research Inc., 451
- Integration of cryocoolers with:
 - 4K superconducting magnets, 627, 653, 813
 - cryogenic heat pipes, 831
 - data acquisition system, 853
 - demountable thermal interface, 813, 823
 - flexible diode heatpipe, 1
 - flexible thermal link, 807, 885, 917
 - flight electronics, 711, 841

- focal plane dewars, 885
 - heat interceptor, 79, 783
 - HTS applications (*see* HTS applications)
 - integrated thermal bus, 1
 - multilam make-break interface, 823
 - photoconductive detectors at 4K, 949
 - phase change materials, 747
 - space experiments (*see* Space experiments)
 - space instruments (*see* Space instruments)
 - SQUIDS, 727, 765, 925, 935
 - systems integration software (CSIM), 1, 861
 - temperature stabilization system, 747, 765
 - tension-band cryo load support, 773
 - thermal storage, 747
 - thermal switch, 795
- J-T cryocoolers:
- 10K SH₂ sorption, 567, 577
 - APD 65K 2-stg MR/O, refrig., 537
 - APD CryoTiger, 515, 521, 737, 925
 - Ball 77K closed-cycle COOLLAR, 493
 - BETSCE flight experiment, 567, 577
 - charcoal/nitrogen sorption, 597
 - heat exchangers for, 547
 - micromachined cooler, 687
 - mixed-refrigerant experiments in China, 529
 - MMR Technologies, 509
 - Neon for HTS applications at 25K, 547
 - pressure fluctuations in, 737
 - RAL/MMS 2-4 K closed cycle, 949
 - STC integral J-T/Stirling for 4.5K, 557
 - use with SQUIDS for NDE, 925
 - vibration of APD CryoTiger, 737, 925
- Jet Propulsion Laboratory:
- AIRS cryocooler system design, 885
 - astrophysics applications, 577
 - BETSCE, 567, 577
 - gas-gap heat switch, 795
 - piston resonance characteristics, 421
 - sorption coolers, 567, 577, 587
