

***Transient Thermal Model of the JWST  
MIRI Cryocooler***

***M.B. Petach, Northrop Grumman, Redondo Beach, CA; and B.  
Moore, JPL, Pasadena, CA***

This paper describes the transient thermal model of the JWST MIRI cooler, including the active control loops in the cooler and lumped approximations of the MIRI instrument and JWST observatory. The model predictions are compared with data from ground testing and initial flight operation.
